What's new in Fifa 22:

- **New player rating system:** We've introduced the first major change to how a player's overall rating is calculated as of game play. It's now based on the facts and deeds you, as a player, contribute to your club. By earning achievements — such as scoring a goal, winning a match, or creating a goal-scoring opportunity — you'll provide evidence for your rating. This also means players are acting in accordance with their true form, which they can improve to reap significant rewards.
- **New Tactic Creator feature.** We've created a new tool to allow you to create the perfect game-breaking formation and playstyle for soccer.
- **The performance in FIFA 22 can now match the vision through All Seeing Eye.** All Eyes delivers unrivaled gameplay realism for the players on both sides. Each player on the pitch, including the goalkeeper, will now respond to the ball in new and realistic ways.
- **In addition to new game play, the other aspects of development are on the rise.** The previous version of the game featured more than 400 high-resolution, accurate and detailed team visuals, a new replay editor, and unique tackle animations. All these new features have been rewritten from scratch. Game play has been completely redesigned as we approach the launch of this new game on September 27 on PlayStation 4, Xbox One and Windows Store.
- **More than 50 different players and 360 teams are available to create your FIFA Ultimate Team squad.** Each starting XI is packed with Pro players from 40 different countries and reflects the competitive balance in the key FIFA competitions. In addition, players who have the most authentic likenesses will have more accurate animations in motion, such as performing tricks, and kung fu kicks.
- **Double the number of player movements for more realistic athletic runs.** Players now have twice the number of unique running animations, and more than 200 new animations have been added to the player controls.
- **Improved rest mode.** All players will now immediately go to their fatigue indicator regardless of which 10-minute interval is selected. You'll now see the fatigue indicator instead of the time remaining. You'll have more time to play without having to worry about being benched.
- **Additional camera angles to show a full-size view of the play and**
