What's new in The Entity: Returning Home:

Speedball Shootout I first played VR Speedball in 2012 and then five months later, I picked it up again for free in an attempt to free up the hard drive on my PC. I was immediately hooked and soon picked up the original “Throne and Crown” and ended up playing that for more than 2 years. It was the first game I played in VR and I was certainly not the only one enjoying the experience. The game quickly became highly sought after because of its popularity. Having recently had the chance to check out the VR version of the game, I did a little look back at my experience and see if the game has remained true to what I enjoyed so much back in 2012. Let’s begin. Pro’s

Simply put, other than the already mentioned popularity and ongoing support, the game has some really great pro’s. You can play the current mode multiplayer with 3 people up to 12 people online, and there is also a unique mode called “Wrecking Ball” where you control an old truck that drives around all the time hitting the ball at the various players. Along with local multiplayer and local “Wrecking Ball” you can also control up to seven AI characters that will run around and do some damage to their enemies. In short, the game has all the addicting

aspects of the classic game such as the destructible environments, combo system, as well as some of the original game's modes. Of course you can play it in VR, which really amps up the action and adds the element of "point of view" realism where you can take the ball and smack the ball at the characters chasing you. That's always a good feeling! Pros So what are the cons? Sure, the game still has the bugs that plagued it back in 2012 when it was released for Steam and the Oculus Store. For example, when you play multiplayer or local, it is not uncommon for the game to sometimes get buggy and stop working. Okay, so the game is getting old with those old tricks but the developers are keeping up with fixes and improvements so they are definitely pushing to rectify those problems. Just keep in mind that you should expect some bugs during you VR experience and not everything will be perfect. Otherwise, the game can really add to the VR experience. Cons There are a few cons to the game though, since this game was designed for VR, not all

This is a single-player experience. Don't worry, it is still just as fun and addicting as the original version of Clash Cup. You are in control of one of 8 different characters. Every character has their own set of strengths and weaknesses, but they all play very similarly. To spice things up, for a short period of time the game is FREE. On July 3rd, 2017 the multiplayer will go back to the prices it was at when it was originally released and this single-

player option will be pulled. If you prefer to go the single player route, don't worry! Once you purchase the game and it's free, you can still continue playing single-player all the way to the very end. How to Play: -Tap to throw the puck -Stick your controller in the direction you want to go -Catch the puck and attack the enemy goal to take control of the puck -Protect the puck and prevent yourself from scoring -All characters have unique turbo abilities, but all are based off classic turbo actions from other games. For

example, Joustu blocks a collision with his powerful legs and Combo blocks a collision with his fist. Learn how to use each character's turbo abilities and use them effectively to best each level!
