In this post, I'll discuss how we build mobile applications for many of our clients, especially Facebook applications, and I will demonstrate using Retale to do so. The first thing we need to do is to setup our server to serve the mobile version of our apps. Within our Retale account, we have "app1" which is the Android version, and "app2" which is the iOS version. Let's setup both of these. The Retale portal will automatically detect which platform you're using and will present you with the app version. If you're using Application Loader, you
